OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793
AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR DIS-
CLOSURE OF ITS CONTENTS TO AN UNAUTHORIZED PERSON IS
PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. Repair activity for artillery, tanks, and motor vehicles in the Soviet Army was divided into three categories: "tekuchi remont" (maintenance), "sredni remont" (medium repairs), and "kapitalni remont" (major repairs). "Tekuchi remont" was performed by the using unit. Each tank regiment had a shop for maintenance work. In peacetime, the regiment could perform medium repairs, such as overhauls. In wartime it had facilities only for maintenance, and medium repairs were done in army shops. Major repairs were performed by shops of the front. The same system applied to trucks. Companies and battalions could perform maintenance only if they were independent units.
2. In artillery repair activities, which included not only work on field pieces but also on such weapons as machine guns, mortars, and rifles, maintenance was done in regiment. Division performed medium and major repairs.
